## **Cardiovascular Services**

Services available at St. Joseph's Regional Medical Center, St. Joseph's Wayne Hospital, a division of St. Joseph's Regional Medical Center, and St. Joseph's Children's Hospital

Recognized by the American Heart Association/American Stroke Association as one of the first hospitals in the nation to achieve compliance with its guidelines for quality management of coronary artery disease, heart failure and stroke, St. Joseph's provides advanced invasive and non-invasive diagnostic, treatment and rehabilitation services including cardiac catheterization, angioplasty, EPS and cardiac surgery. Our interdisciplinary team of compassionate, clinical experts use the latest technology and procedures to pinpoint the nature and scope of each patient's individual needs.
